

ANIRUDH VERMA

Information Technology Student | Software Development | Applied AI | Creative Technology

Vapi, Gujarat, India | +91 9636844057 | techmax1245@gmail.com | github.com/asqi06 | linkedin.com/in/anniverma

PROFILE

Information Technology undergraduate focused on building practical software and AI-enabled products. Hands-on experience with Python, JavaScript, web development, Git/GitHub and AI API integration, with project exposure to RAG, computer vision, automation and local AI workflows. Founder of PrintKarr, a student-focused printing platform and kiosk concept. Also brings 5+ years of hands-on experience in 3D, VFX and digital production.

TECHNICAL SKILLS

Core	Python, JavaScript, HTML5, CSS3, Git, GitHub, AI API Integration, Prompt Engineering
Working Knowledge	React, Node.js, REST APIs, Flask / FastAPI, Responsive Web Development
Project Exposure	RAG, LLM applications, OpenCV, YOLOv8, MediaPipe, Speech-to-Text, Embeddings, Vector Retrieval, Arduino / ESP32
Creative Tech	Blender, After Effects, Premiere Pro, Houdini, Unity; familiarity with Unreal Engine, Maya and Character Creator

PROJECTS

PrintKarr - Hyperlocal Printing Platform & Automated Campus Kiosk

Founder / Developer | 2026 - Present

- Building a student-focused platform for document upload, print configuration, order processing and hyperlocal print delivery.
- Designed a QR-based self-service kiosk workflow connecting a web interface, Wi-Fi and printer automation; developed the operational flow and campus pilot proposal.

Voice-Enabled RAG Pipeline

Applied AI Project

- Designed a prototype pipeline for speech-to-text, chunking, retrieval, reranking and LLM response generation using the MSMARCO-XI dataset.
- Explored caching, streaming and P50/P95/P99 latency measurement while testing speech and retrieval approaches.

Computer Vision Video Analysis

AI/ML Project

- Experimented with Python, OpenCV, YOLOv8 and MediaPipe Pose for object detection, pose estimation and human activity analysis.
- Combined detection and pose components into a prototype automated video-analysis workflow.

AI-Integrated Web & Local LLM Experiments

Independent Development

- Built responsive web prototypes with HTML/CSS/JavaScript and React, including generative-AI API integrations and interactive interfaces.
- Experimented with local LLM inference, API wrappers and AI-assisted development workflows on limited-resource hardware.

EXPERIENCE

Independent 3D / VFX Artist & Video Editor

Creative Technology | 5+ Years

- Produced independent 3D environments, animation, simulations, cinematic visuals and edited content using Blender, Houdini, After Effects, Premiere Pro and related tools; experience spans modeling, lighting, rendering, compositing and visual storytelling.

EDUCATION

Bachelor of Engineering (B.E.) - Information Technology

Laxmi Institute of Technology, Sarigam | Gujarat Technological University | 3rd Year Undergraduate

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, Web Development and Software Engineering

ADDITIONAL

Interests: Software Engineering, Applied AI, Full-Stack Development, Automation, Computer Vision, Developer Tools, Product Building | Communication: Technical presentations on practical AI tools and emerging technology.
